

2nd semester 2025 - 2026

Teacher(s)	Ana Margarida Rocha Cardoso Nunes Costa (teacher responsible)
Duration	Semiannual
ECTS credits	4.0
Scientific area	222 - Languages and Foreign Literature (LLE)
Area of specialisation	n.a.
Attendance regime	no
Contact hours	Theoretical/Practical Sessions = 3 hours
Workload	108 hours
Department / School	Escola Superior de Tecnologia e Gestão de Águeda
Language(s) of instruction	English
Mode(s) of instruction	Presential

Study programme	Cycle	Year	Mandatory
2100 - Higher Professional Training Course in Networks and Computer Systems	CTeSP	1st	Mandatory

Learning objectives

By the end of this curricular unit, the student should be able to:

- select, interpret and synthesise relevant information from texts focusing on the course's core areas;
- produce linguistically accurate texts, orally and in writing, adapting the speech and the register to different communication contexts.
- demonstrate linguistic accuracy when identifying and using specific terminology in the area;
- use ICT as a tool to validate terms and concepts resorting to terminological databases, dictionaries, grammars, glossaries,...

Course contents

In order to promote the development of the main language skills (listening, writing, reading and speaking) for specific purposes, the following themes will be explored*:

1. Operating Systems
2. User Interfaces
3. Computer Applications
4. Networks
5. Internet Security
6. Customer Service (Business Writing and Computing Support)

7. A career in IT

*Other topics may be addressed whenever deemed appropriate.

Articulation of activities

The proposed activities are structured and articulated, promoting the students' development of reading, writing, speaking and listening skills, individually, in pairs and in groups. These activities include practical (written and oral) tasks, endowing students with linguistic skills that enable them to interpret and produce functional and technical texts, resorting to several online tools, i.e. terminological databases, dictionaries, glossaries, grammars...

Teaching and learning methods

The methods used in class aim at providing students with simulations of authentic contexts, in which they are supposed to apply the theoretical knowledge acquired.

Active learning

In order to promote the students' autonomy, activities based on authentic documents will be privileged, especially those available online. Group work, as well as the oral presentation of the students' results, will also be privileged, enabling, thus, the development of competences as to: team work, collaboration, meeting deadlines, following guidelines, information selection, etc.

Calculating the final mark

- TP (100.00%)
 - Discrete evaluation
 - Individual assignment 2026-03-26 (15.00%)
 - Written test 2026-05-21 (50.00%)
 - Oral presentation 2026-05-28 (35.00%)
 - Final evaluation
 - Written exam (60.00%)
 - Oral exam (40.00%)

Prerequisites

No requirements.

**Coherence course
contents / objectives**

The course's contents set ground for the fulfilment of the learning outcomes defined for the students.

**Coherence methods /
objectives**

The activities are organized in two groups: (i) analysis and production of text (orally and in writing), (ii) systematization and practice of different grammar topics. The former is frequently based on the analysis of audio files and videos, aiming at stimulating students to produce (oral and written) texts. These activities are seen, when possible, as a starting point for the discussion of cultural and grammatical contents, crucial for effective verbal communication. Thus, the defined learning outcomes will be met, endowing students with basic linguistic competencies in the area of English Applied to Information Technologies.

The issuing of certificates for these documents is the sole responsibility of the Academic Management Services of the University of Aveiro.
