

English Applied to Computer Science

Higher Professional Training Course in Network and Computer Systems 2025/2026

Objectives

This course aims to provide students with linguistic competences for the analysis, interpretation and production of technical texts in English, according to the descriptors defined in the CEFR level B1.2.

Learning Outcomes

By the end of this course, students should be able to:

- Read and understand technical and scientific texts in English;
- Produce functional texts for specific purposes and give an oral presentation of the work developed within the scope of this course;
- Use IT to validate terms and concepts, exploring terminological databases, dictionaries, glossaries, among other resources.

Course content

Unit 1: Operating Systems

Unit 2: User Interfaces

Unit 3: Computer Applications

Unit 4: Networks

Unit 5: Internet Security

Unit 6: Customer service

Unit 7: A Career in IT

Lessons: Thursday, 10:00 – 13:00 (Room 5.1.24)

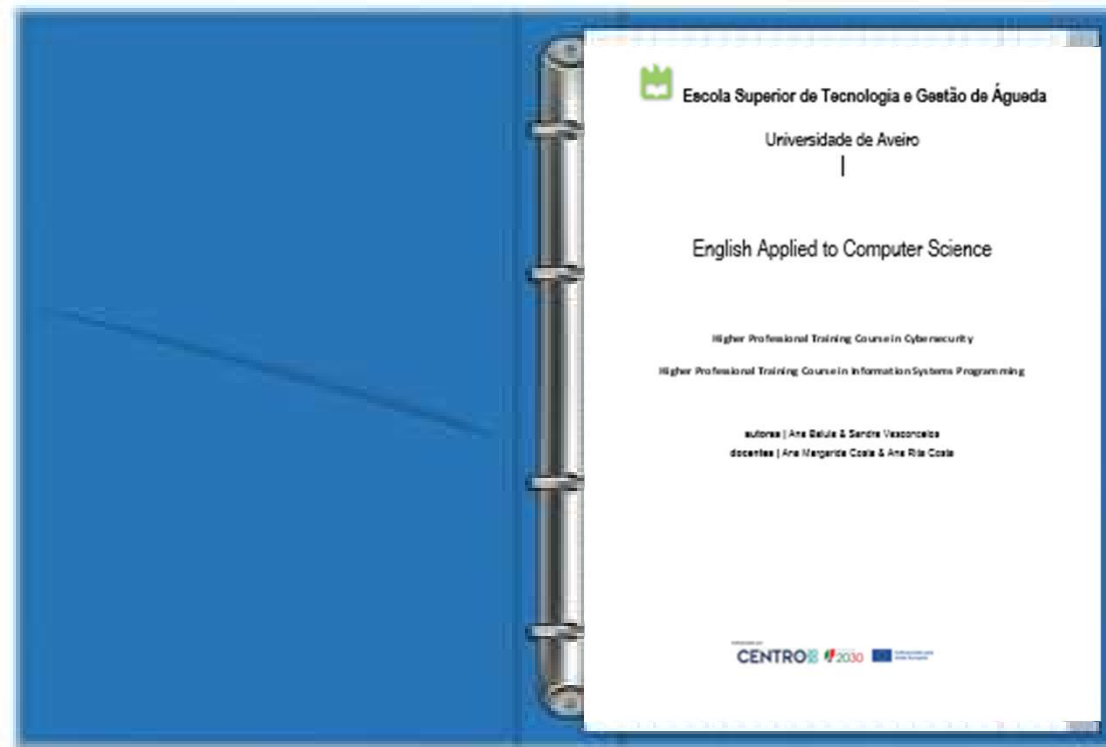

February	12	19	26		
March	5	12	19	26*	
April	Páscoa	Páscoa	16	23	Semana Académica
May	7	14	21**	28#	

* Individual assignment

** Written test
(Group) oral presentation

Course materials

All materials are organised in a course booklet available in your eLearning platform.

Assessment

A. Discrete assessment

- Oral (group) presentation (35%): 28.05.2026
- Individual assignment (15%): 26.03.2026
- Written test (50%): 21.05.2026

Preferential

B. Final assessment

- Written test (60%) + oral test (40%): (exam season)

C. Recurso/Melhoria

- Written test (60%) + oral test (40%): (exam season)

Additional notes:

1. As defined in article 30, paragraph 2, of REUA, if students wish to opt for **Final Assessment**, they must communicate this decision to the teachers during the first two weeks of the semester (**26th February**).
2. In case of non-attendance to / submission of one of the assessment elements, students will be graded with the final mark “Faltou” (code 77).
